

How to access your “Your files on the NTNU server” (“Hjemmeområdet”) at the lab

1. Open file explorer.
2. Find “Map network drive”

3. Fill in as follows:

I did not specify the Drive, a “random” letter was given.

4. Click Finish.
5. If you are an employee use: “\\home.ansatt.ntnu.no\yourUsername” instead.

We repeat: **Do NOT work directly from the network drive.** Copy the files to a local place on the hard drive as specified in the lab assignment text. Remember to take backups as the local files may not be there the next time you visit.
